"Project Lifesaver" is a program that uses radio transmitters to track clients that have Alzheimer's and Related Mental Dysfunction Disorders. These clients are in danger of wandering and not being able to find their way back home. Project Lifesaver's motto is **"Bringing Loved Ones Home"**. The police put a small transmitter on a client. It's about the size of a watch. Each one has it's own frequency. If the client wanders away, the Police respond with the tracking equipment and locate the client. There have been 2619 lives saved and credited to Project Lifesaver. The average locating time is 30 minutes. Currently the program is used by 1200 agencies in the USA, Canada and Australia. The program was established in April of 1999 by the 43rd Virginia Search and Rescue Company of the Chesapeake Sheriff's Office. We currently have 42 clients in James City Co.

The Police department goes to each client monthly to change out the batteries in the transmitters. As long as there are funds available, the program will always be free to the public.

PLUS we will collect canned foods for The Salvation Army food bank. We will try to make it fun as we "STUFF THE CRUISER" full of cans.

Registration Form

CAR # _____
for Official Use Only

Owner's Name _____

Vehicle Year _____ Make_____ Model_____

City_____ State _____
